EDUCATION

Prairie View A&M University | Prairie View, TX **Expected May 2028**

B.S. in Computer Science, GPA: 3.95/4.0

TECHNICAL SKILLS

Languages: Python, Swift, JavaScript, TypeScript, C#, C++, SQL
Frameworks & Libraries: React.js, React Native, SwiftUI, UIKit, ASP.NET Core, FastAPI, Flask, PyTorch, TensorFlow, Scikit-learn, OpenCV, MediaPipe
Databases, Cloud, & Tools: PostgreSQL, MySQL, Redis, Microsoft Azure, Google Cloud Platform (GCP), Docker, Git, Kubernetes
Certifications: Microsoft Azure Fundamentals (AZ-900), Lean Six Sigma White Belt

RELEVANT EXPERIENCE

PVAMU Department of Computer Science | Prairie View, TX **September 2026 - Present**
Computer Vision & Graphics Research Assistant

- Harmonized drone and satellite image data from 10+ sources into a single dataset, smoothing the training process for change analysis and digital twin production

General Motors Financial | Arlington, TX **May 2026 - August 2026**
Software Development Engineer Intern

- Developed a new troubleshooting interface for internal support using **ASP.NET Core** and **React.js**, reducing the time required to investigate Alternative Bureau responses
- Collaborated with multiple engineers to plan, design, and review a new REST API endpoint, supporting secure and reliable retrieval of **Azure Cosmos DB** data before integrating it into a new internal support application
- Expanded telemetry coverage by 2× across enterprise **ASP.NET Web Forms** application through implementation of **Azure Monitor Application Insights** client-side logging, enabling faster debugging of production issues and improved visibility into user interactions

PVAMU Department of Electrical and Computer Engineering | Prairie View, TX **July 2025 - May 2026**
Machine Learning Research Assistant

- Improved insect classification accuracy by over 5% on a ResNet50 model trained across millions of insect images using Sequential Transfer Learning implemented with **PyTorch**
- Built a **TensorFlow** MLP that automated detection of faulty dried soil samples using predicted quality features, improving dataset quality for downstream analysis

General Motors Financial | Fort Worth, TX **May 2025 - July 2025**
Sophomore Leadership Intern

- Developed an **Automation Anywhere** solution that streamlined transfer of 100+ records while collaborating on talent acquisition initiatives adopted by the following intern program

PROJECTS

YardScan | *PVAMU Ignite Hackathon, 1st Place* **February 2026**

- Developed a full-stack web application using **React.js**, **FastAPI**, and **MySQL** in collaboration with four teammates that recommends suitable plants from a single yard photo
- Trained a **PyTorch** CNN, achieving 96% soil type accuracy on and powering the app's plant recommendation pipeline
- Designed the application's three-tier architecture, database schema, and mobile-friendly UI, enabling clear separation of responsibilities and streamlined team development

Broke Shot Detector | *Published iOS App* **January 2026**

- Published a **SwiftUI** app that provides personalized basketball shooting analysis using computer vision for 50+ users
- Built a REST API using **FastAPI** and **OpenCV** for image processing and containerized for production using **Docker**
- Developed a **PyTorch** MLP using **MediaPipe** pose landmarks, achieving over 80% test accuracy despite limited data

LEADERSHIP

PVAMU Data Science Club | Prairie View, TX **June 2026 - Present**
Vice President

- Led the restructuring of the club's e-board into 7 positions, allowing for focus on new initiatives including connecting members to more opportunities and completing club-wide projects that members can collaborate on
- Led inaugural club project by spearheading communication with school's athletic department, and general body participants to ensure all parties receive benefit from the initiative and tasks are completed in timely fashion
- Executed the gamification of technical workshops, leading to greater reported engagement and content retention
